Table A.11 – Hydrogeological characteristics of the aquifer of the lower-upper quaternary alluvial-delta horizon (water intake structures – mine wells)

| Rural districts | Quantity, pcs | Depth, m | Static level, m | Debit, dm ³ /s | Mineralization, g/dm ³ |
|-------------------|------------------|----------|--------------------|------------------------------|--------------------------------------|
| Karatobe district | | | | | |
| Egindikul | 1 | 9,5 | 8 | 2,09 | 0,6 |
| Zhusandoy | 2 | 4,8 | 3,8 | 1,49 | 0,3 |

Table A.12 – Hydrogeological characteristics of the aquifer of the lower-upper quaternary alluvial-delta horizon (water intake structures – wells)

| Rural districts | Quantity, pcs | Depth, m | Static level, m | Debit, dm ³ /s | Mineralization, g/dm ³ |
|-------------------|------------------|----------|--------------------|------------------------------|--------------------------------------|
| Karatobe district | | | | | |
| Koskul | 2 | 40-50 | 3 | 1,3-1,4 | 1,3-4,2 |
| Egindikul | 1 | 50 | 3 | 4 | 4,2 |
| Zhusandoy | 7 | 30-45 | 3-4,8 | 1,1-1,7 | 0,2-0,7 |

Table A.13 – Hydrogeological characteristics of the locally aquiferous lower-mid-quaternary deluvial horizon (water intake structures – mine wells)

| Rural districts | Quantity, pcs | Depth, m | Static level, m | Debit, dm ³ /s | Mineralization, g/dm ³ |
|-------------------|------------------|----------|--------------------|------------------------------|--------------------------------------|
| Baiterek district | | | | | |
| Makhambet | 1 | 19 | 10,5 | 2,2 | 0,5 |

Table A.14 – Hydrogeological characteristics of the locally aquiferous lower-mid-quaternary deluvial horizon (water intake structures – wells)

| Rural districts | Quantity, pcs | Depth, m | Static level, m | Debit, dm ³ /s | Mineralization, g/dm ³ |
|-------------------|------------------|----------|--------------------|------------------------------|--------------------------------------|
| Baiterek district | | | | | |
| Zelenov | 2 | 12 | 3 | 1,2 | 0,8 |
| Beles | 1 | 23 | 6 | 0,9 | 3,2 |
| Makhambet | 2 | 25 | 4-10,5 | 0,05-0,6 | 0,8-2,2 |
| Zheleznov | 2 | 17-25,5 | 3,5-6 | 0,3-2,5 | 0,9-3,6 |

Table A.15 – Hydrogeological characteristics of the locally aquiferous lower-upper quaternary horizon of the upper part of the syrtic stratum (QI-III_{sr3}) (water intake structures – wells)

| Rural districts | Quantity, pcs | Depth, m | Static level, m | Debit, dm ³ /s | Mineralization, g/dm ³ |
|-------------------|------------------|----------|--------------------|------------------------------|--------------------------------------|
| Kaztalov district | | | | | |
| Karaoba | 2 | 35-43 | 7-12 | 0,7-1,24 | 8,5 |
| Kushankul | 4 | 33-42 | 7-16 | 0,5-1,24 | 2,8-5,3 |
